

A scatter plot consisting of numerous blue circular data points. The points are densely packed in the center of the image, forming a large, irregular, and somewhat circular cluster. As the distance from the center increases, the density of the points decreases significantly, with fewer points scattered towards the periphery. The overall shape is roughly circular but with many internal voids and a fuzzy, cloud-like boundary. The points are uniformly colored blue and have a consistent size. The background is plain white, and there are no axes, labels, or titles present in the image.
